

R DESIGN

Independent driving.

Products that can help a person to safely
and independently drive a vehicle.

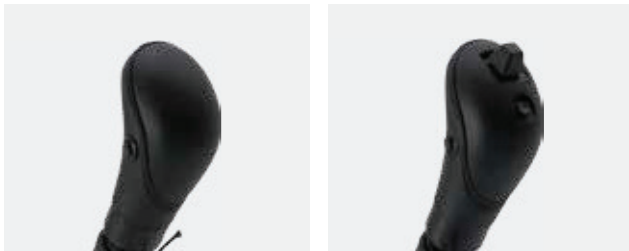

Carospeed® Classic

Hand control for accelerator and brake.

Carospeed Classic E

The Carospeed Classic moves the control of acceleration and brake from feet operated pedals to one hand operated lever. Pull the lever to accelerate and push to brake.

The hand control comes with a “hill holder”, a set function for the brake that frees up the hand for instance when changing from Drive to Neutral or tuning the radio. A simple and durable design that leaves extensive leg room for the driver. Carospeed is not in the way of knee air bags.

Available in two versions: standard model with only the basic accelerator and brake functions and E model with a complete set of electrical functions such as left and right indicators, windscreen wipers, washers, horn, high and low beam and set function for the cruise control.

Quick facts

- Durable hand control
- Floor mounted
- Universal, suitable for most vehicles
- Responsive and direct driving feel

To guarantee your safety Autoadapt products are designed and tested according to current directives and standards.

- 100271** Carospeed Classic, left (operated by right hand)
- 100841** Carospeed Classic, right (operated by left hand)
- 100730** Carospeed Classic E, left (operated by right hand)
- 100840** Carospeed Classic E, right (operated by left hand)
- 100748** Universal mounting bracket

Requires a mounting bracket (100748) for installation.

Accessories are available separately.

Carospeed® Menox

Hand control for accelerator and brake.

Carospeed Menox

The Carospeed Menox moves the control of acceleration and brake from feet operated pedals to one hand operated lever. Pull the lever to accelerate and push to brake. Menox is designed to make each control ergonomic, conforming to a person's natural hand-wrist-arm motion.

The hand control comes with a "hill holder", a set function for the brake that frees up the hand for instance when changing from Drive to Neutral or tuning the radio. A simple and durable design that leaves extensive leg room for the driver. Carospeed is not in the way of knee air bags.

The optional multi-function grip maximizes the ability to operate headlights, turn indicators and more from the hand control.

Quick facts

- Floor mounted
- Universal, suitable for most vehicles
- Wide range of upholstery selections
- Optional multi-function grip
- Easy to install and adjust

To guarantee your safety Autoadapt products are designed and tested according to current directives and standards.

- 102013** Carospeed Menox, left (operated by right hand)
- 102014** Carospeed Menox, right (operated by left hand)
- 102057** 8-way multifunction box
- 102064** Carospeed Menox stripped, left (operated by right hand)
- 102065** Carospeed Menox stripped, right (operated by left hand)
- 100748** Universal mounting bracket

Requires a mounting bracket (100748) for installation.

Accessories are available separately.

Steering devices

One-hand grip for steering wheels.

Adapter for steering device

Needed for mounting any of our steering devices on your steering wheel.

102145 Adapter for steering device

The steering knob, the wheel spinner and the steering device are all the same product. A grip that lets you control your vehicle's steering wheel with just one hand. Available in a wide range of models and colours to suit your individual preferences.

Low model

The low design allows for the fingers to be in constant reach of the turn signals, cruise control and so forth. Available in 4 colour choices.

Standard model

The same handle as the Carospeed Menox hand control, for individuals seeking a uniform look and feel with their hand control. Available in 4 colour choices.

Round model

The round knob is available in two dimensions; 40 mm and 50 mm. Available in 4 colour choices.

Model Ergo

Oval shaped ergonomic design in a soft touch material.

2- and 3-pin model

A 2-pin or a 3-pin steering device for individuals with impaired hand function. Can easily be reshaped to fit the hand.

To guarantee your safety Autoadapt products are designed and tested according to current directives and standards.

Pedals

Independent driving

Left foot accelerator

Flip-Up model

Adds hinges to the left foot accelerator and the original accelerators, allowing for the desired pedal to be lowered into place while the other can be tucked away. Universal design that can be installed in RHD and LHD vehicles as well as in most makes and models.

102044 Flip-up model

Quick Release model

Mechanically controls the vehicle's original accelerator. As the name suggests the pedal can easily be removed to restore original function. Universal design that can be installed in RHD and LHD vehicles as well as in most makes and models.

102045 Quick release model

Pedal extension

Pedal Extension Mini

Enables an extension of 3-9 cm. The pedal extension can be lowered into place and tucked away when not in use. Models are available for both automatic and manual vehicles.

102047 Pedal extension mini, automatic gearbox
102048 Pedal extension mini, manual gearbox

Pedal Extension

Enables an extension of 10-30 cm. Adjustments can be made for distance, height and the desired space between pedals. They are also fitted with a quick release, to be easily removed. Can be installed into both automatic and manual vehicles.

102049 Pedal extension, automatic gearbox
102050 Pedal extension, manual gearbox
